GRAPHIC CLEAN

INK REMOVER CONCENTRATE

DESCRIPTION:

GRAPHIC CLEAN is a concentrated, low VOC ink remover containing a balanced formula for the fast complete removal of Flexo and water washable printing inks. GRAPHIC CLEAN provides low foaming and easy rinsing. When used according to directions, GRAPHIC CLEAN is safe to use on rubber and plastic die materials. As with any strong cleaner, rubber gloves should be used to prevent the removal of natural oils from the skin.

DIRECTIONS:

Dilute each part of GRAPHIC CLEAN with 15 to 64 parts of water for the removal of Flexo and water washable inks from rubber and metal printing rolls, dies and other equipment. GRAPHIC CLEAN is also effective for cleaning out ink lines. For difficult to remove glycol base inks, a prespray of GRAPHIC CLEAN at higher concentration will provide quicker removal.
