

THE SURTEC SYSTEM

SUR-FOAM HYGIENE SOLUTIONS

FROM CENTERS FOR DISEASE CONTROL & PREVENTION:

"Keeping hands clean is one of the best ways to prevent the spread of infection and illness."

"Handwashing is easy to do and it's one of the most effective ways to prevent the spread of many types of infection and illness in all settings—from your home and workplace to child care facilities and hospitals. Clean hands can stop germs from spreading from one person to another and throughout an entire community."

Surtec Has the 'Solutions' for Your Maintenance Problems!

INTRODUCING SURTEC SUR-FOAM FOAM SOAP DISPENSING SYSTEM

From the clean contemporary lines of the dispenser, to the unique push pad placement and rich luxurious foam soap, SUR-Foam by Surtec has the solution for every hand soap need.

BEST IN CLASS FEATURES INCLUDE:

Guaranteed leak proof: Soap dispenser pump is at the top eliminating leaking.

Economical to use: Each push yields .75 mL of rich soap versus 1.5mL per push for most bag-in-box liquid systems.

Three thick rich formulas: Choose between Foaming Luxury Hand Soap, Foaming Anti-Bacterial Hand Soap or Foaming Instant Hand Sanitizer for the best fit in your facility.

ADA Compliant: Large, convenient push pad located at the top, rather than the bottom is ADA compliant, requiring one hand and less than 5 lbs. of pressure to dispense product.

Large view window: This large window provides a clear view, easy to monitor soap levels without guessing or opening dispenser to check.

Multi-Lingual: Each bag individually labeled in English, Spanish & French for easy identification & use

Aspergillus niger 16404	>99.9%

#AD00615 6 X 1000 ML/CASE

SUR-FOAM DISPENSING SYSTEM BENEFITS

Foam soap spreads on your hands easier than liquid soap.
Foam stays where you spread it. Liquid goes where it wants to go.

FOAM BENEFITS: SOAP SAVINGS

Switching from Liquid to Foam will cut soap usage in half

Liquid Soap Dispensing Dose is 1.5mL
Foam Soap Dispensing Dose is .75mL

800mL Liquid ÷ 1.5 per dose = 533 Liquid Doses Per Bag
1000mL Foam ÷ .75 per dose = 1333 Foam Doses Per Bag

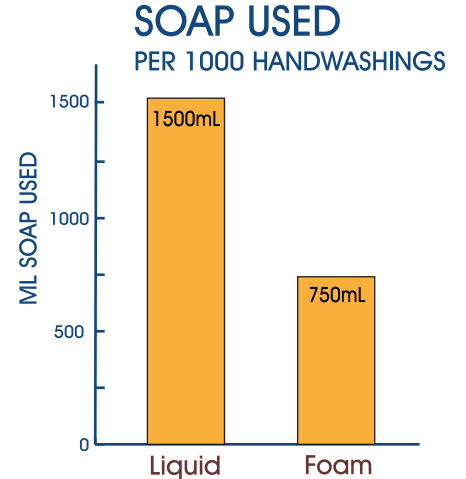

FOAM BENEFITS: WATER SAVINGS

Switching from Liquid to Foam will cut water usage by 250 mL per dose

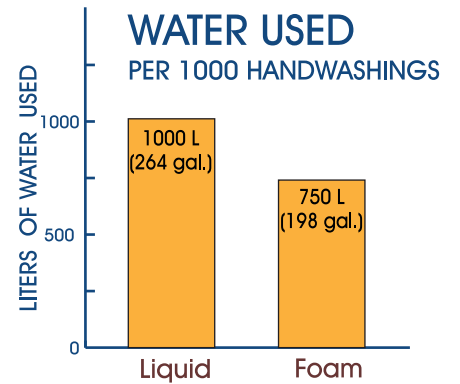

The average faucet runs at 50mL per second
If foam saves 5 seconds of water with every dose, that's 250mL water savings per dose

1333 doses per bag x 250m: per dose = 333L or
88 gallons water savings per 1 L bag

Foam saves 50% more soap!

Foam saves 25% more water!

SUR-FOAM Mid-size 18 oz. pump bottle
Surtec's SUR-Foam No-Alcohol Hand Sanitizer is now available in 18oz. (532mL) pump bottles. Ideal for cleaning hands when soap and water is not available. Kills 99.9% of common germs that cause disease.

FROM CENTERS FOR DISEASE CONTROL & PREVENTION: Environmental Cleaning & Disinfecting for MRSA

What is the difference between sanitizers, and disinfectants?

- Sanitizers are used to reduce germs from surfaces but not totally get rid of them.
- Sanitizers reduce the germs from surfaces to levels that are considered safe.
- Disinfectants are chemical products that destroy or inactivate germs and prevent them from growing.
- Disinfectants have no effect on dirt, soil, or dust.
