

HY-PER BRIGHT CSB

LB-343

ALL FABRIC LIQUID OXYGEN BLEACH

DESCRIPTION:

HY-PER BRIGHT CSB is for today's modern fabrics that require a safe bleaching agent. It's a highly concentrated oxygen bleach, which is safe on all white and colorfast washable fabric. It removes oxidizable stains and helps prolong and brighten linens and garments. HY-PER BRIGHT CSB even helps revitalize the color of dull and faded fabrics, reduces linting and prevents tensile strength loss. Add manually, use it in place of chlorine bleach. HY-PER BRIGHT CSB is a clear liquid and compatible with all detergents and soaps including enzyme products.

COLOR: Clear Liquid

DIRECTIONS:

Concentrations will vary according to water hardness, soil load, water temperature, time and machine efficiency. When using HY-PER BRIGHT color-safe (oxygen) bleach, add to wash solution 3 to 5 minutes after the wash cycle begins. Never apply undiluted bleach directly to fabric. Dispense bleach after fill water has entered the machine. When used as directed, HY-PER BRIGHT CSB is safe on cotton, linen, and synthetic fabrics. It may damage natural silk, wool or nylon. For best results, use after the "break" and/or "Suds" operation at the temperature of 155° F. in a pH range from 10.2 to 10.8 for 8 minutes. Do not rinse at temperatures over 155° F. Excessive volumes of iron in the water supply will accelerate bleaching action causing a loss of efficiency throughout the cycle and may deposit iron on fabric. Pre-sort laundry prior to wash. Pre-soak and pre-spot laundry when necessary. Place proper amount of laundry into laundry machine. When bleaching, use 4 - 6 oz. of this product per 100 pounds of dry cloth. Works best if temperature is between 120° - 160°F. When souring and/or softening, use recommended sour and/or softener at the proper use dilution.
