DEOZYME LIQUID ENZYMES

DZ-446

ODOR CONTROL AND SPOT AND STAIN REMOVER

DESCRIPTION:

DEOZYME LIQUID ENZYMES are specially formulated to digest and eliminate odors and simultaneously break down and solubilize a wide range of soils and spots, including kitchen oils, blood, cosmetics, fecal matter, urine, pet stains, and many other spots and stains. DEOZYME LIQUID ENZYMES are natural, biodegradable and highly effective on many surfaces such as carpet and fabrics, as well as restrooms, drains, and food preparation areas.

DEOZYME LIQUID ENZYMES may be added full strength to grease traps, drains, septic tanks, and portable toilets to dissolve fats, oils, and other organic materials present in these areas.

DIRECTIONS FOR CARPET:

Always pre-test in an inconspicuous area for colorfastness before use.

Remove any excess organic material from the affected surface with a scraper or clean cloth. Dilute DEOZYME LIQUID ENZYMES at a rate of 8 to 16 ounces per gallon of water. Use cool or lukewarm water for dilution - NEVER use hot or boiling water, as this will kill the beneficial bacteria that create the enzymes.

Apply directly to affected area. Lightly agitate with carpet spotting brush until spot dissolves, then blot with a clean, terry cloth towel, working from the outside toward the center.

For heavy spots and stains, do not blot the diluted DEOZYME LIQUID ENZYMES; instead apply undiluted DEOZYME LIQUID ENZYMES to area and let dwell 30 minutes or longer. Cover with a clean cloth moistened with the diluted DEOZYME LIQUID ENZYMES solution. After sufficient dwell time to remove the stain and odor, blot with a clean cloth or extract.

If treating an odor problem that affects a large area, DEOZYME LIQUID ENZYMES may be used as a space and general surface deodorizer. Dilute as above, then spray into area and/or onto affected surfaces. Do not use in conjunction with disinfectants, bleach, etc.

SPECIFICATIONS:

COLOR: White opaque
ODOR: Pleasant
HMIS RATING Health = 1 Flammability = 0 Physical Hazard = 0
FLASH POINT: None (C.O.C.)
DILUTION RATE (carpet): 1:8 (16 ounces per gallon)
BACTERIA COUNT: Greater than 200 billion per gallon
BACTERIA CULTURES: Protease, Lipase, Amylase, and Cellulase enzymes
METHOD OF APPLICATION: Spray, brush, spin bonnet, extract
COVERAGE (approximate): 1800 square feet per gallon
DWELL TIME: 30 minutes or more, depending on type and amount of waste to be digested.
U.S.D.A. AUTHORIZED: Yes (food processing plants)
BIODEGRADABLE: Yes
pH: 5 to 8
DETERGENT TYPE: Nonionic
SPECIFIC GRAVITY: 1.01
DENSITY: 8.4 pounds per gallon
SOLUBILITY IN WATER: 100% (hard, soft and/or deionized water)
SHELF LIFE: Minimum 1 year from date of sale (50° to 95° F. storage)
FREEZE/THAW STABILITY: Protect from freezing
CONTAINER SIZES AVAILABLE: 12 x 1 quart bottles
..... 4 x 1 gallon jugs
..... 5 gallon pail

rev. 2/2/11
